

Dayton Audio Sound Exciters, create a completely hidden surround sound system!

DAYTON, Ohio, December 22, 2008---- Dayton Audio Sound Exciters turn virtually any solid object into a speaker by vibrating it at speeds of up to 20,000 cycles per second. We've tested and placed Sound Exciters on nearly everything you can imagine; under a desk, in an overhead cabinet, behind picture frames, inside cans, behind paper plates, inside binders, cardboard, scraps of wood and even the box they came in! Test the limits of your imagination.

Each stick on Sound Exciter is designed using patented nxt® transducer technology for a wide frequency response and great sensitivity. Built-in push terminals enable quick connection to the included pre-stripped speaker wire. Strong 3M adhesive pads affix to nearly any solid surface for secure, long-lasting playback. Package includes two Dayton Audio Sound Exciters and two pairs of 5 ft. speaker wire.

Dayton Audio has been a leading supplier of loudspeaker drivers and speaker building accessories for over ten years. Each product is designed and engineered in the U.S.A. to offer the highest level of performance and value. Audio enthusiasts know they can trust Dayton Audio to have the best selection of speaker building products and components for any project. Dayton Audio combines real-world design with high-tech manufacturing techniques. Dayton Audio products can be purchased through the following authorized retailer in the USA: Parts Express (parts-express.com). Visit us online at www.daytonaudio.com
