

Discover the Raw Power of the new SA1000!

DAYTON, Ohio, March 15, 2010--- Dayton Audio's new line of amplifiers has expanded to include the SA1000, a freestanding high-power subwoofer amplifier designed for the DIYer, installer, and systems integrator. This unique monaural subwoofer amplifier delivers the raw power of a pro-sound amp, but with the features and flexibility of a dedicated subwoofer amplifier.

The patented tracking, down-converting power supply ensures headroom for instantaneous power needs and operates cool due to its high-efficiency design. A class AB output stage provides a clean and controlled output signal. From a performance standpoint, a low frequency parametric EQ allows you to boost or cut to custom-tailor the sound to suite the environment of the room.

Dayton Audio has produced and distributed the finest, high-value loudspeaker drivers and speaker building accessories for over ten years. Each product is designed and engineered in the U.S.A. to deliver the highest level of performance and value. Audio enthusiasts rely on Dayton Audio to provide the best selection of speaker components for any project. Dayton Audio combines real-world design with high-tech manufacturing techniques. Dayton Audio products may be purchased through the following authorized retailer in the USA: Parts Express (parts-express.com). Visit us online at www.daytonaudio.com
