The subwoofer that fits virtually anywhere!

DAYTON, OH --- The versatile new Dayton Audio VS8 low-profile subwoofer was engineered to accommodate the challenging space requirements of modern home audio installations.

The VS8 features an innovative space-saving design. Compactness, various mounting possibilities, and multiple wiring configurations make Dayton Audio's newest subwoofer a perfect addition to any stereo, home theater, or even car audio system. This subwoofer can be installed permanently in walls, floors, or ceilings, but is attractive enough to deploy in "opportunistic" locations like behind a sofa, beneath a table, or tucked into a corner.

The VS8 also features a complex flared port bass reflex design and an 8" long-throw woofer that provide a surprising amount of bass from such a compact subwoofer. The contemporary dark brushed aluminum-look vinyl wrap will complement any décor.
