**Everything you loved about the Mk III Titanic Subwoofers,
but now with even better performance!**

DAYTON, OH – Dayton Audio improved everything that made the Titanic Mk III subwoofers stand out as the loudspeaker industry's top-of-the-line low frequency drivers. This new benchmark series is the Mk 4 generation.

Dayton Audio's TS320D-4 Titanic Mk 4 12" subwoofer is built with a sturdy aluminum die-cast frame that keeps everything perfectly aligned while handling the insane amounts of air pressure it's capable of generating inside a sealed enclosure. An extended pole piece keeps more of the voice coil in the gap for maximum motor control.

The re-tooled motor focuses increased magnetic flux in the gap, thereby lowering Qes and Qts. The Mk 4's optimization produces higher-fidelity performance in an enclosure sized similarly to the Mk III subwoofers' requirements.

About Dayton Audio

Dayton Audio has been a leading supplier of audio and video products for over ten years. Dayton Audio offers some of the finest lines of consumer electronic products today. Every Dayton Audio product is designed and engineered in the U.S.A. offering the highest level of performance and value, backed by industry-leading warranties and support.
