

## Enjoy the Convenience of Bluetooth

**DAYTON, OH (February 28, 2019)** – One of Dayton Audio's top-selling amps, now has Bluetooth!

The APA102BT was developed as an upgrade to the original APA102. You can now enjoy the features of Bluetooth 4.2 with aptX.

In addition to Bluetooth 4.2, the APA102BT features two auto-source switching RCA line inputs as well as a master line output, great for feeding additional zones or even powered subwoofers. Removable rack ears are also included for quick and easy rack installations.

The APA102BT features 80 watts RMS per channel into 4 ohms and 60 watts RMS per channel into 8 ohms. In bridge mono mode both amplifier channels are combined for high power monaural output. Rated at 160 watts RMS bridged into an 8 ohm load, the APA102BT has enough power for even the most demanding applications.

No matter what the application, this feature-rich and versatile amplifier will get the job done.
