

## **The Centerpiece of Your Home Theater**

**DAYTON, OH (March 27, 2018)** - The impressive sound quality offered by the Dayton Audio MK442 center channel speaker is awe-inspiring. The MK442 is designed to complement the Dayton Audio MK402 bookshelf speakers in a multi-channel home theater system.

The MK442 features an attractive textured, black vinyl finish that stands out at first glance. The cabinet offers a unique geometric design for the baffle that sets it apart from much more basic speakers in its price range. The grill is removable and made with a high-quality black cloth that discretely obscures the most appealing features of this design, the drivers. These speakers are able to reproduce frequencies as low as 60 Hz, and offer a natural sound with excellent sonic detail. The 3/4" soft dome tweeter paired with two 4" treated-paper cone woofers is a pairing made in audio heaven.

The 3/4" tweeter is elegant with a very airy top-end that can be appreciated by anybody that enjoys the delicate side of music that is often left behind by most speakers. The dispersion from this tweeter provides a life-like ambiance that truly sets a scene in a movie.

The woofers used in the MK442 are able to play down to 60 Hz with ease. A 4" woofer playing low frequencies would normally limit the upper frequency range, which is not the case here. The woofers play through a large portion of the vocal range, adding coherency and smoothness to voices.

### **About Dayton Audio**

For more than 20 years, Dayton Audio has been a leading supplier for audio and video, combining real-world design with high-tech manufacturing techniques to offer some of the finest consumer electronic products today. Every Dayton Audio product is designed and engineered in the USA to provide the highest level of performance and value, backed by industry-leading warranties and support.
