

Dayton Audio Introduces a Unique Space Saving Subwoofer for the MK Series

DAYTON, OH (February 11, 2019) - Dayton Audio introduces the MKSX4 low profile passive subwoofer to complement the popular MK family of speakers. By utilizing the same high excursion drivers as the MK402 bookshelf speakers, the MKSX4 cohesively supplements any speaker in the MK family.

The Dayton Audio MKSX4 utilizes a unique manifold driver layout which helps mitigate unwanted resonance and vibration. This design also boosts the overall output by sharing the load across four 4" high excursion woofers. The versatile design allows the subwoofer to be placed upright or flat depending on your listening space.

The MKSX4 boasts an extended 40-500 Hz frequency response and a solid 160 watts RMS power rating. A sensitivity rating of 88 dB and impedance of 4 ohms makes this subwoofer easy to power with pretty much any amplifier.

The MKSX4 subwoofer is a great solution for small 2.1 systems. Simply add a set of MK402 bookshelf speakers and a Dayton Audio DTA2.1BT2 amplifier and you are ready to rock.
